ENABIL Your Strategy Business Technology Assessment (BT Δ)

ENABIL's BTA is designed to analyze discrete components of your organization's business support infrastructure, to assess the alignment between those and your organizations defined business strategies and objectives, and to deliver specific and actionable recommendations to address gaps and deficiencies.

- > Our approach is to adopt a holistic view of your organization to ensure a comprehensive understanding and appreciation of your business strategy, objectives and market drivers.
- > Our analysis leverages a breadth of business and technology experience
- > Our recommendations consider alignment with strategy and objectives; return on investment; regulatory compliance; and emerging technologies.

BT Δ Highlights

- > Establish **business strategy and objectives**
- > Identify business and **technology drivers**
- > Define **desired state**, driven out of business strategy and objectives
- > Define **current state** of information systems, technology management policies and supporting processes
- > **GAP analysis**
- > Provide **actionable recommendations** to address gaps and ensure processes and technology meet and support current and future business requirements
- > Provide **implementation roadmap** with project prioritization and resource requirements
