# ENABIL Your Projects

## ADVANCE = LAUNCH + ADVISE

ENABIL's Project Management practice offers a comprehensive suite of Project Management services to address the challenges associated with project delivery and to mitigate risk throughout the entire project life cycle.

**ADVANCE** is designed to help organizations plan, guide, monitor, and execute projects, and to ensure project successes are replicable through targeted mentoring and resource development initiatives.

**LAUNCH** provides an experienced senior Project Management resource to work with project sponsors and stakeholders to establish project structure and to formally kick-off project initiatives.

- > Facilitate project planning, set up and initiation to **get important initiatives off the ground**
- > **Decrease project risk** with sound project structure and governance from the outset
- > **Accelerate project launches** and leverage existing Project Management resources

**ADVISE** provides experienced senior Project Management resources to work with existing Project Managers to monitor and control, execute and close projects, ensuring projects deliver expected business benefits.

- > Provide the necessary **governance and oversight to all projects**
- > Leverage access to Senior Project management resources to provide **mentorship and development to your resources**
- > Use of the PMI® Project Management Body of Knowledge helps **drive continuous improvement** and adoption of **best practices** through in-house Project Management capabilities
